INTRODUCTION

MOTIVATION

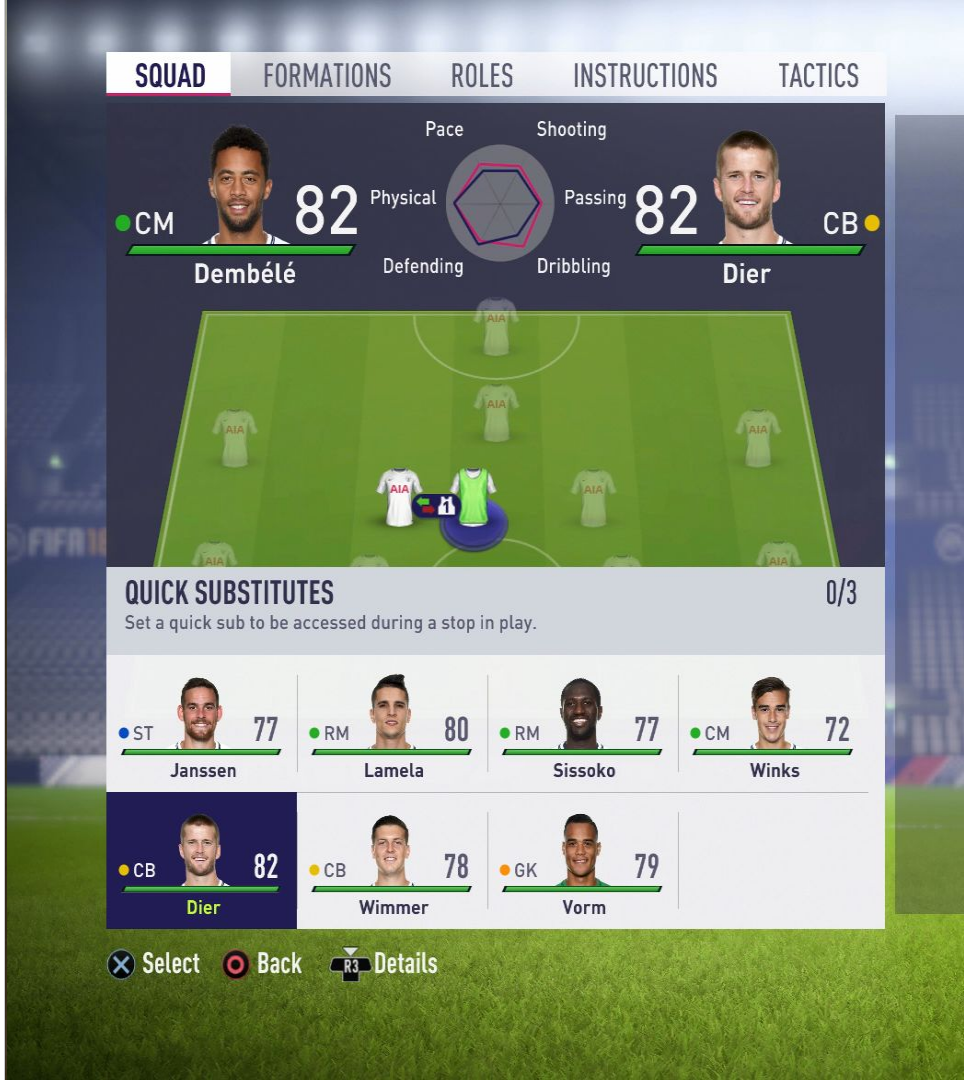
- Football visualization is enjoyable
- To address difficulties from gamer point of view
- To address visualization unavailable in the game
- To provide different strategic view with visualization

EXAMPLE OF PROBLEMS

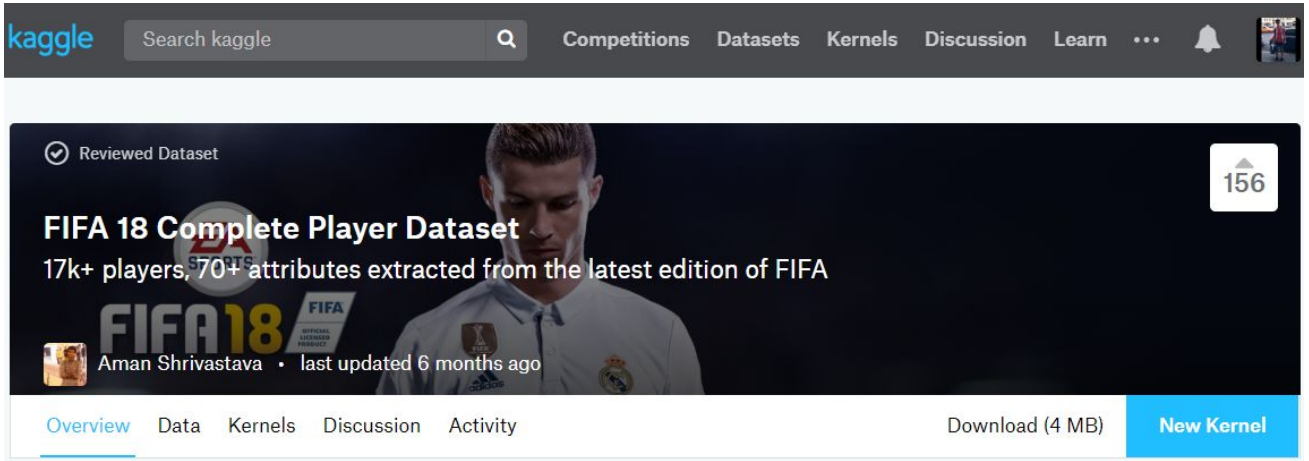
- Unavailable visualization of countries with high rated players or high rated youth.
- Unavailable visualization of potentials of youth players

- Hard to visualize the polygon.
- Harder for human eye to remember the area of the polygon

- Comparison available only during specific time
- Multiple comparison not possible



DATASET



- Every player featuring in FIFA 18
- Based on actual data of EA's FIFA 18 game
- 70+ attributes with playing position data
- Player personal data like Club, Age, Wage, etc.
